

Adopting Prevention Approaches to Strengthen Your Clinical Practice

Keith L. Kaufman, Ph.D.
Joan Tabachnick, M.B.A.

ATSA's commitment to prevention recognizes that no societal problem has ever been eradicated without the simultaneous use of both effective prevention and treatment approaches. This workshop provides a practical approach for integrating prevention strategies into your clinical practice. Topics covered will include:

- Grounding prevention in the public health model;
- Advantages of adding prevention approaches;
- ATSA members' current prevention practices – results of a national survey;
- Five powerful prevention strategies to adopt; and
- Tailoring prevention approaches to fit your practice.

Handouts and case illustrations will help you explore how to include effective prevention approaches into your current practice.
